

Approved Installation of Ventilation Panels in Garage Door

Approved Feb 2, 2017

Standards:

- Before you install this, you need to check with your flood insurance company.
- Dimensions of the panels should be approximately 16" wide by 8" high
- The panels can only be installed on the left and right corner of the lower garage door section (must use two panels)
- The panels must be painted white or the color of the garage door
- The panels must be aluminum
- The panel should include a screen
- Homeowner should check with home insurance and make sure their home insurance is not voided
- Recommended panels (price is for one panel):
 - From screenroomstore.com for \$30.95, size 6 3/8" by 16 1/2"
 - From coolmygarage.com for \$30.00, size 7 1/2" by 15 1/2"
